Personal information

Basic Information:

- Name : Sonakul kamnuanchai
- Age: 29 years old
- Education: Bachelor's Degree in Computer Engineering from Mae Fah Luang University. Currently pursuing a Master's degree in Data Science and AI at AIT.
- Current Role: Network Engineer at PEA, managing router configurations for regional electricity sector services.
- Work experience: 4 years in Network Engineering and 2 years in IOS Developer.

Research Interests:

- Machine Learning (ML) and Natural Language Processing (NLP) for optimizing network performance and improving communication systems.
- Exploring ways to integrate machine learning algorithms with computer networks to make systems more intelligent and efficient.
- Network Optimization using AI algorithms to enhance system stability and performance.

Core Beliefs about Technology:

I believe that technology should improve lives and adapt to societal needs, not replace humans and technology should work in harmony with social values, ensuring that it helps solve problems without negatively impacting society.
